PlaylistTrack	8,715
Track	3,503

Chinook data model represents a digital media store, including tables for artists, albums, media tracks, invoices and customers.

Chinook data model is an ER Model.

# Chinook Database

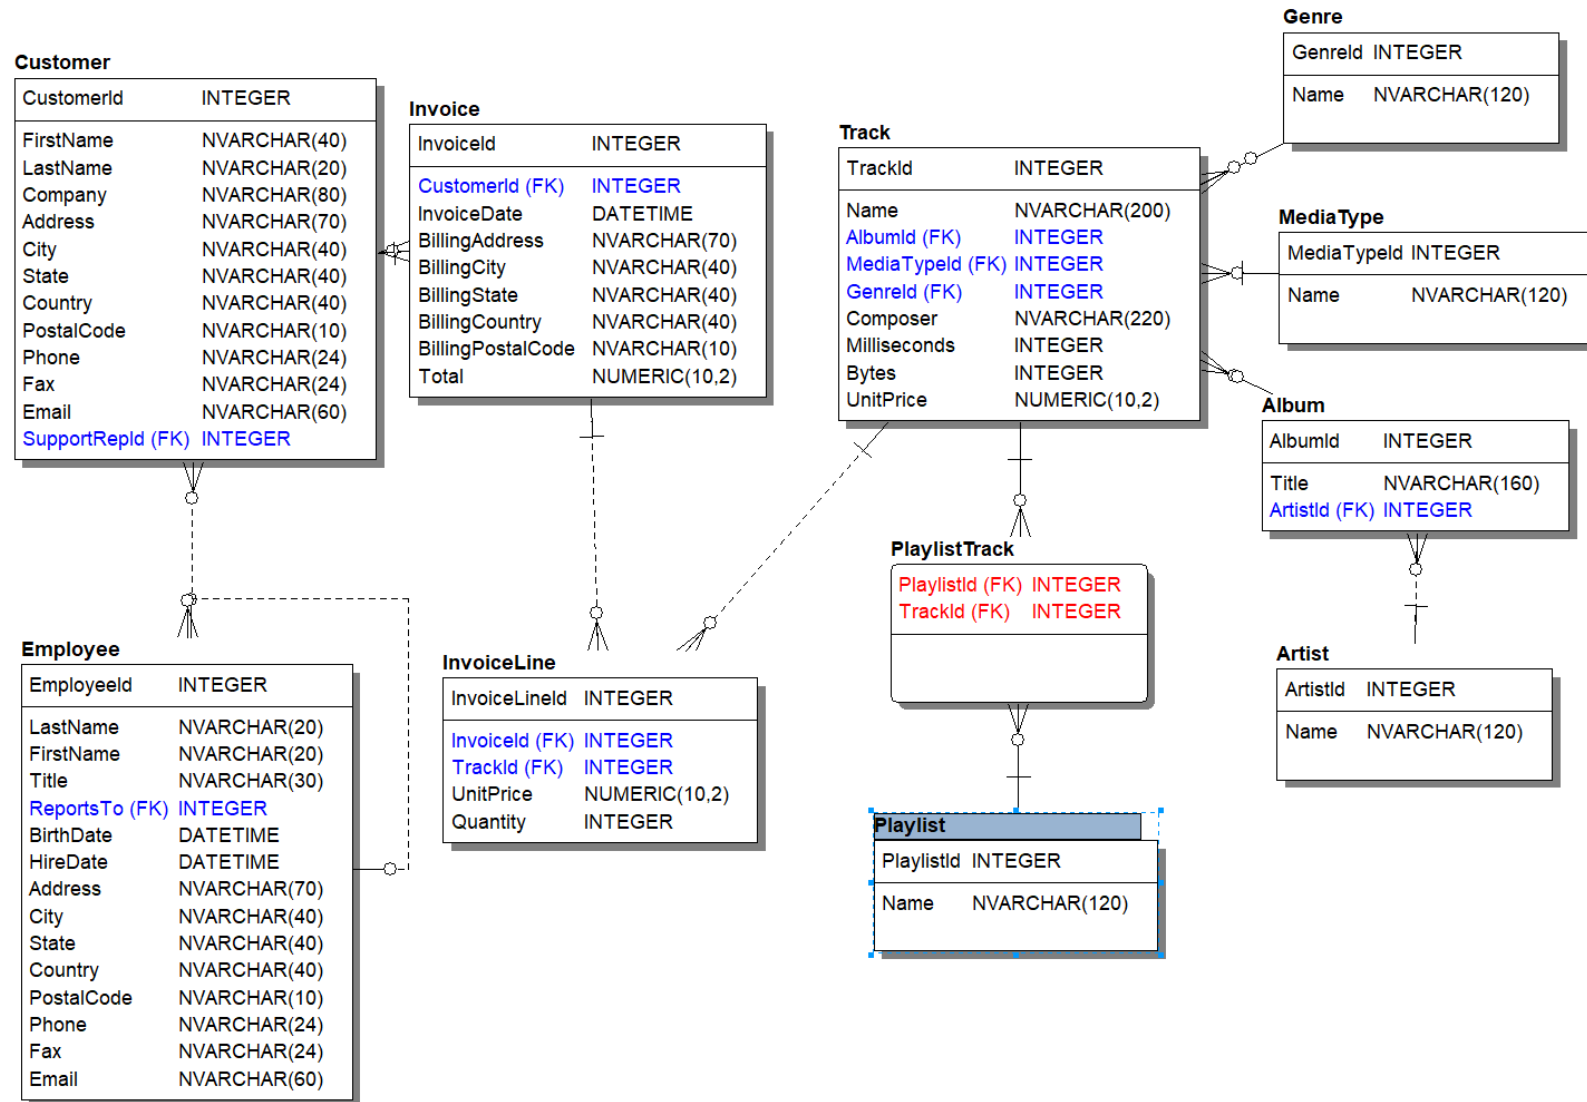

# Chinook Database - Tables

- Employee table stores employee data such as employee id, last name, first name, etc. It also has a field named ReportsTo to specify who reports to whom.
- Customer table stores customers data.
- Invoice & InvoiceLine tables: these two tables store invoice data. The invoices table stores invoice header data and the invoice\_items table stores the invoice line items data.
- Artist table stores artists data. It is a simple table that contains only the artist id and name.
- Album table stores data about a list of tracks. Each album belongs to one artist. However, one artist may have multiple albums.
- MediaType table stores media types such as MPEG audio and AAC audio files.
- Genre table stores music types such as rock, jazz, metal, etc.
- Track table stores the data of songs. Each track belongs to one album.
- Playlist & PlaylistTrack tables: playlists table store data about playlists. Each playlist contains a list of tracks. Each track may belong to multiple playlists. The relationship between the playlists table and tracks table is many-to-many. The PlaylistTrack table is used to reflect this relationship.
